Gummi Bear Lab Debriefing

1. Which question did you choose for your lab?
2. What was your hypothesis?
3. List the materials you used.
4. Described the steps you followed for your experiment.
5. Was your hypothesis correct? If not, identify any factors which may have caused your experiment to yield different results than you expected.
6. Come up with one other question you might have liked to test in the lab other than the ones provided.
